The History of Cape Hatteras Lighthouse

Cape Hatteras Lighthouse is one of the most iconic lighthouses in the United States. It is located on Cape Hatteras, a narrow strip of land that juts out into the Atlantic Ocean from the coast of North Carolina. The lighthouse was built in 1803 to warn ships of the dangerous shoals and currents that surround the cape.

The original lighthouse was a brick tower that was 90 feet tall. In 1870, the lighthouse was replaced with a taller, cast-iron tower that was 191 feet tall. The new tower was much more resistant to storms and erosion, and it has stood for over 150 years.

Cape Hatteras Lighthouse has played a vital role in maritime safety for over 200 years. It has helped to prevent countless shipwrecks and has saved the lives of many sailors. The lighthouse is also a popular tourist attraction, and it is one of the most photographed lighthouses in the world.
