 <p>Training is mostly short-term with a concrete goal.</p>	 <p>Development is a long-term activity with goals that are open-ended and ongoing.</p>
 <p>Training focuses on the role.</p>	 <p>Development focuses on the person.</p>
 <p>Training aims at a specific job or role requirement.</p>	 <p>Development is more contextual and focuses on overall progression of the individuals.</p>
 <p>Training involves rapid iterations, or the present need.</p>	 <p>Development activities are future.</p>
 <p>Training enhances the knowledge or skills for a particular job or role.</p>	 <p>Development focuses on career building and progression.</p>
 <p>Training programs are highly focused, where more than one individual participates in organized group forms such as workshop, classes, seminars, etc.</p>	 <p>Development activities tend to be more of a personalistic experience, which is geared based on the individual's development plan.</p>
 <p>The Organization takes the responsibility of training.</p>	 <p>Development involves assessment procedure, where individuals are held responsible for creating and owning their development plan &amp; activities.</p>
