In a world where the Roman Empire reigns supreme, a startling discovery challenges everything we thought we knew. Deep beneath the ruins of the Colosseum, a team of archaeologists uncovers evidence of a forgotten civilization—a Neanderthal community that thrived in the shadow of the Eternal City.

As the layers of history are peeled back, the lives of these enigmatic beings come into focus. Meet Lyra, a young Neanderthal woman torn between her loyalty to her clan and her forbidden love for a Roman soldier. Follow the adventures of Akram, a skilled hunter who navigates the treacherous streets of Rome in search of food and survival. Witness the clash between two distinct cultures as they struggle to coexist in an ever-changing world.

### **A Tapestry of History and Fiction**

"Read In One Sitting" is not merely a historical novel. It is a masterful blend of meticulous research and vivid imagination. The author, Dr. Emily Carter, draws upon the latest archaeological findings to create a realistic and immersive world that breathes life into the long-extinct Neanderthals.

Through the eyes of her characters, Carter invites us to question our assumptions about these ancient hominids. Were they as primitive as we've imagined? Did they possess a rich culture and complex social structures? The novel forces us to reconsider the boundaries between civilization and savagery, and to confront our own preconceptions about human nature.

## **A Literary Page-Turner**

Beyond the historical significance, "Read In One Sitting" is also an unputdownable page-turner. Carter's writing is evocative and engaging, drawing you deep into the story from the very first page. The characters are relatable and flawed, their struggles and triumphs echoing our own human experience.

Whether you are a history buff, a lover of fiction, or simply someone fascinated by the mysteries of the past, "Read In One Sitting" is a must-read. Prepare to be captivated by a tale that will linger in your mind long after you finish the final page.
